Professional Summary

Computer Science graduate specializing in Artificial Intelligence Machine Learning, with hands-on experience building end-to-end AI/ML applications, data analytics solutions, and production-ready web APIs.

Internship Experience

Power BI – For Business Applications – Microsoft Elevate & AICTE

Feb 2026 – Mar 2026

- Built a Telecom Customer Churn Analytics solution in Power BI by automating data preprocessing, performing segmentation and trend modeling, and generating insight-driven reports to optimize retention strategies.
- Delivered an interactive dashboard with optimized UI/UX and dynamic KPIs, enabling faster interpretation of churn metrics and contributing to 12% improvement in customer retention.
- Conducted exploratory data analysis to identify churn drivers and behavioral patterns, providing actionable insights that supported critical, data-backed business decisions.

Data Science & Analyst Intern – Proxenix

Jan 2026 – Mar 2026

- Performed data cleaning, preprocessing, and exploratory data analysis using Python.
- Built interactive dashboards and visual reports using Microsoft Power BI.
- Assisted in developing and evaluating machine learning models for predictive analytics.

AI: Transformative Learning with TechSaksham – Microsoft & SAP (Edunet Foundation)

Nov 2024 – Dec 2024

- Contributed to the development of a spam email classification system using machine learning, with hands-on exposure to building an automated workflow for classifying spam and non-spam emails.
- Built systematized text preprocessing pipelines (cleaning, tokenization, feature extraction), reducing data prep time by 35%.
- Worked in a team-based environment to analyze results, document findings, and present outcomes aligned with industry problem statements.

Projects

Student Complaint Management System (SCMS)

Bootstrap, Django, Python, SQLite

- Engineered a secure, role-based web application facilitating streamlined workflows for 500+ potential users using Django authentication.
- Architected a full complaint lifecycle including priority-based submission and automated staff assignment, reducing manual processing time by 30%.
- Executed SLA tracking with precise deadline calculation and computerized escalation protocols via Django signals.

Text Summarization System

Flask, NLP, Python, Transformers

- Spearheaded the development of an NLP system supporting both extractive and abstractive summarization techniques.
- Utilized Transformer-based models to generate coherent summaries while maintaining 90% context preservation.
- Integrated user-defined length controls and a non-probabilistic confidence score to validate summary reliability.

Movie Review Sentiment Analysis

Flask, ML, NLP, Python

- Developed an end-to-end sentiment analysis system using TF-IDF vectorization and Logistic Regression, achieving 87% accuracy on 50,000 IMDB reviews.
- Implemented a complete NLP preprocessing pipeline including text cleaning, stopwords removal, and stemming.
- Deployed the trained model as a Flask web application using Git-based version control.

Education

B.Tech in CSE (AI & ML) – Sphoorthy Engineering College, JNTU Hyderabad

2022–2026

CGPA: 8.23

Intermediate – Srichaitanya Junior College

2020–2022

CGPA: 8.20

SSC – Raghunatha Model High School

2020

CGPA: 10.0

Technical Skills

Programming Language: Python
Databases: MySQL, MongoDB
Workflow Automations: n8n, Zapier
Data & BI Tools: Databox, Power BI
Web Frameworks: Django, Flask, Streamlit
Version Control & Other Tools: Git, Microsoft 365

Certifications

Full Stack Web Development with AI Tools - EY and Microsoft	Jan 2026
Data Analyst Professional - Udemy	Dec 2025
n8n: A Complete Guide to the Automation Tool - Analytics Vidhya	Oct 2025
GenAI Powered Data Analytics Job Simulation – Forage	Aug 2025
Innovating with Google Cloud AI – Google Cloud & Simplilearn Skillup	Oct 2024

Soft Skills

Team Collaboration Adaptive Learning Analytical Thinking Professional Communication Strategic Planning
